

THE NON - JUDICIAL PARENT

In closing you may ask "So why did you write this? What did you hope to gain?"

And the answer is, I wrote this so hopefully this cannot happen to anyone again. Now that you're aware of the games they play, wouldn't you now be in a better position to stop it? When you understand or when you have seen their dirty tricks, you have a better chance of standing up against it. You can say, "Look what they did to him, Look at what they're trying to do to me."

But don't kid yourself. You can't start playing this demented game, and then insist your doing it because your "ex-husband" or your "ex-wife" has been doing it to you. That quite simply will not work.

In this situation, those who were supposed to "act" simply refused to do their job. And as such, any evidence that might have been obtained for criminal proceedings has been tainted. I know for a fact that my ex-wife has changed her Internet service provider, so she no longer has an AOL account or the same log-in password. Had AOL customer service provided me with a telephone number to contact their legal division, who knows what might have happened? Instead the customer service representative who I spoke with told me to just erase the data and refused any and all requests I made after that. But they are not the only one complacent in this matter.

THE NON - JUDICIAL PARENT

My own attorney, a "Judge Pro Temp" in the Riverside County Superior Family Law Court also told me to just erase the data, and give the computer back to my daughter. Huh, you would think the implications of destroying criminal evidence would have suggested to him that was a very stupid idea. Well... you would think anyway. Had the FBI taken this matter seriously, had I been able to get a Court Commissioner or a Judge who was not corrupted, a Court Commissioner who did not "Sheppard the Courtroom" in a sexually biased, and sexually discriminatory matter... maybe something would have happened then.

Who knows? Who can say?... I have kept my daughter's computer secured, and intact with all the data unmolested. And I did this just in case these blinded idiots were and are just that... Blind Idiots. If my daughter is ever molested, I still have the computer, I still have the criminal evidence when I initially cried a call of concern, cried a call of warning with. But then having the knowledge for the rest of my life that "I was right all along" will not mean shit to me, while I carry the burden that she was molested and I could do nothing about it. So I did this to help someone, anyone, since they would not help me. I wrote this book, I started a company to publish this book, and I paid to have it printed. My Company? Caecus Fidelis Modica LLC... It's Latin, and translated it means "Blind Faith Moderate" or loosely translated to mean "Blind Faith (in) Moderation."

THE NON - JUDICIAL PARENT

That's what I once had. "Blind Faith" that our legal system, our Court system would do its' job. "Blind Faith" that everyone involved in this, was an educated Professional dedicated to "Public Service"... Sadly I was wrong once more. What truly un-nerves me is that everyone involved with this felt very comfortable with their actions, and in what they were doing. Comfortable because they believe you and I are stupid, that we do not realize what they are doing is a perversion of justice; and as such very, very wrong. They felt comfortable doing this, because they have been doing this for quite a while together. I know, and I still possess the knowledge of what they should have been doing, and exactly when they should have been doing it. And when they failed in this, I challenged them, when I presented them with these facts, reminding them that they were not conducting themselves as they should, I was ostracized. I had my God given rights as a Father, as a Parent, taken away from me because I was identified as an "Angry Man". As I have stated many, many times before... Nowhere in our Legal Systems beliefs of Laws, Rules and Regulations in the entire United States of America, is it a crime for you to be guided by emotion. Nowhere is it a crime for you to be angry, exasperated, displeased, crossed, irritated, or to suffer from indignation, pique, annoyance, fury, wrath, ire, outrage, irascibility, vexation, or to be ill tempered or ill humored. It is neither illegal nor immoral.

NOWHERE.
